

FIRST week of SCHOOL

Last Tuesday morning each classroom was assigned an air conditioned area in the school, church hall, lunchroom or church that they could have access to during the school day due to the high humidity and hot temperatures. Students have also been encouraged to bring in water bottles to stay hydrated during the day. Unfortunately, our electrical service does not allow for each classroom to have it's own window air conditioning unit. We are hoping to raise funds to redo some of our electrical work and replace all the classroom windows in the near future. Anyone who might be interested in a brainstorming session to get a campaign started can reach out to Mrs. Fahey at 563-568-2415 or email at kfahey@st-pats.pvt.k12.ia.us.

Chillin' in the church!

Coming Home Today!

A box of candy bars will be coming home with the oldest student in each family. Please talk to your child about selling to family and friends and not going door to door unless he or she is with an adult. The safety of our students is our priority! Happy selling!

Father John Moser led a short prayer service and a blessing of the student backpacks to kick off the school year.
